

Innovators and leading suppliers of Thermal & Acoustic Insulation to the UK Construction Industry.

## Insulate Innovate Newsletter

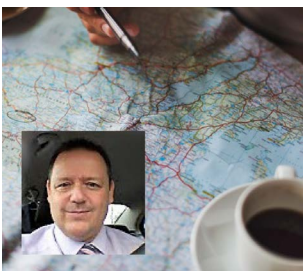

At Thermal Economics, we provide high-performance solutions for commercial and private projects that remain cost effective whilst meeting and often exceed building regulation requirements.

With in-house technical knowledge and expertise, we can well support the needs of UK distributors, builders and sub-traders.

Our quarterly newsletter keeps you informed on our latest products and news within the construction market. If you do have any further questions, please contact us on our details below.

## Latest News

Keeping you updated on what has been happening at Thermal Economics over the last quarter.

### Delivering thermal & acoustic insulation to Wales & the South West of England

We know that our customers like to do business with people face to face which is why we have continued to build our sales and account management teams with people based all over the UK. Here, we catch up with Gareth Cole, our South West Regional Sales Executive . . . [Click here](#) for the full interview.

### Robust Details is only as effective if the contractor is aware of the Robust Details Requirements

Reducing sound transmission is often thought to be a 'dark art' because the performance of sound insulation cannot be calculated in a similar way to thermal insulation. Plus, the commonly held rules of thumb that are logical for heat transmission, do not hold true for sound. This creates a risk in design, because the performance criteria for Part E in the Building Regulations depends on results obtained from pre-completion testing . . . Read more [here](#).
